

Aussie Digital

REWRITING THE FUTURE OF E-COMMERCE

AUSSIE DIGITAL. KEEPING IT SIMPLE

Only a small percentage of the world population use Cryptocurrency. Mostly because it seems too complicated or they do not trust it. Aussie Digital is taking an approach to keep it simple. Most projects do not take this into consideration and miss out on the masses of people who may be interested but do not have the knowledge to participate. We want to introduce new people to Cryptocurrency through Fun Shopping and activities you do not need any experience to participate in.

It's All About Small Business

With Brick and Mortar Retail dying out E-Commerce is becoming more and more attractive to retailers every day. The problem is that now like the Greedy Landlord the E-Commerce providers "Ebay, Shopify, Amazon to name a few are getting greedy as well. This is where Aussie Digital shines above the rest. Aussie Digital's "Tradezy" has been designed to help, not hinder the growth of small to medium business online.

The Aussie Digital Ecosystem is based around an ERC20 Digital Token. The Ecosystem includes an Amazon like store builder packed with powerful digital marketing tools and a B2B Trading Platform that integrates Social Media in unprecedented ways. Other services powered by blockchain technology have also been incorporated to speed up the flow of funds which in turn keeps costs down for the Retailer and Shopper alike.

By participating in this Ecosystem, all members can gain Rewards through any Purchases in the form of (AUDcoin) at no extra cost to the merchant or detriment to the user's experience. The merchant and customer get to see the automatic Purchase Reward in real time and will be able to convert them to cash or token if they wish. This also helps to introduce and convert the crypto sceptics to our digital currency as they are encouraged to use their AUDcoins for purchases on the platform and Stake or trade them on our exchange, helping in increasing the usage of the coin.

TRADEZY MARKETPLACE

While "Tradezy" our Retail and B2B Platform is aimed at the use of AUDcoin, purchases can also be made via normal channels.eg: Debit/Credit cards. The customer receives a greater reward when the transaction is completed with AUDcoin. To encourage the acceptance of AUDcoin the Retailer also receives a reward in AUDcoin.

The use of our community coin "AUDcoin" on our Retail Platform (Tradezy) will greatly reduce fees and allow people to trade easily allowing funds to flow freely throughout the Ecosystem, unlike what happens in our current economy where money seems to bottleneck and filter away to big corporations. With the competitive edge of blockchain technology and our minimal fees, we expect the platform to revolutionise.

TREADEZY API CART

Run All Your Stores from One Place! Our APIcart lets you connect to other Marketplaces, allowing Tradezy Store Owners to run all their stores from one central place. Our APIcart allows the importation and exportation of data. "Product, user, and order-related data". This not only lets a user run their current stores but also makes it easy to set up a new store on enabled platforms by population a new store with product data.

TRADEZY TASKER

Tradezy also has a Services component. This Tasker service will allow users to buy and sell services ranging from web-related services to Trade-related services. Users can pay in our native currency or choose to use FIAT. Taskers will be rated and we would recommend services to our Tradezy Store owners should they need it. While Services is part of Tradezy it is also a stand-alone platform that has an APP that can be used to pay people as work is completed for example a Plumber or a Cleaner. For the convenience of our Taskers the Services/Tasker platform is connected directly, just like Tradezy to our exchange so funds can be taken out or swapped for the currency of choice.

TRADEDO EXCHANGE

Tradedo is our own Exchange platform. It is not like most Exchanges. Its purpose is to make Crypto transaction seamless for Business. Users of Tradezy will be able to run on auto pilot. Retailers need to have access to their funds to live. They have not got the luxury of sitting on tokens. They need to cash them in. By turning to auto pilot, the retailers AUD earnings can be converted to the Currency of their choice automatically. Their Tradezy wallet is the same wallet used on Tradedo so by selecting autopilot they are instantly getting market value for their AUDcoin. Small Business has enough to worry about in everyday business. This make life easier for them if they choose to use it.

ACTIVE STAKING WITH AUSSIE DIGITAL

Active Staking involves you actively taking part and is done from Aussie Digital Staking Wallet. This is how we distribute the largest amount of AUDcoin. Active Staking earns you 10% rewards per month. This is done through your Aussie Digital Dashboard. Choose the time you wish to stake for and the amount of coins you wish to put on stake. I.e.: 30days, 10000 coins. Once the stake is finished you can claim your stake or re-stake.

Aussie Digital Utility Token Structure.

AUDcoin is our Official Token based on the ERC-20.

Ownership of AUDcoin also gives ownership of AUDE and AUDB.

(Buy AUDcoin during our fundraising and receive equal amounts of both AUDE and AUDB).

AUDE is based on the ERC-20 while AUDB is based on the BEP-20.

Both tokens are burnable and will be burned weekly upon a voting system.

While all tokens are Utility Tokens and are spendable within the Aussie Digital Ecosystem the ownership of AUDcoin gives more privileges.

TOKENOMICS

| | |
|---------------|---------------------------|
| Token: | ERC20 |
| Token Name: | AUDcoin |
| TOKEN Symbol: | AUD |
| Total Supply: | 25,000,000,000 |
| Rate: | 1 AUDcoin = USD 0.01 |
